With a fervent passion for performance, Jason Silverman has been hooked on the power of live music since seeing his first show at the age of six. Now Founder, CEO and Lead Vocalist for the multi-award winning Hot Mess Band, he knows what he wants and will stop at nothing to accomplish it.

"I eat, sleep and breathe live music, and the 8 other world class musicians that create the Hot Mess ensemble feel the same way. It's all about the show with Hot Mess. No ego's. We are a family that loves nothing more than making and performing live music together." Priding themselves on being one of the best wedding and high profile event bands that Boston has to offer, Silverman puts client satisfaction at the forefront.

"When we play a wedding, we are providing the soundtrack to the most important day in someone's life." explains Silverman. "Not only that, but as the MC/Master of Ceremonies,

it is my job to ensure the train stays on the proverbial tracks. This is not a responsibility that I take lightly. My goal is to provide our clients with the best night of their lives. No exceptions. My love for music allows me to then add my creative flair to keep the set list exciting, fresh and unique to each couple or event." Having recently performed throughout the country and internationally, Hot Mess is more than just incredible music. "We are an immersive experience!" says Silverman.

"The lights, transitions, choreography and sparkly outfits all contribute to the magic that is a Hot Mess performance!" Seeking to keep up with client demand, Silverman is expecting to add a second band under the Hot Mess umbrella by 2024.
